

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

UNITED STATES.

RECIPROCAL NOTIFICATION.

Minnesota.

Cases of communicable diseases referred during February, 1917, to other State health departments by department of health of the State of Minnesota.

Disease and locality of notification.	Referred to health authority of—	Why referred.
Smallpox: Minneapolis Health Department, Hennepin County.	New Hampton, Chickasaw County, Iowa. Glasgow, Valley County, Mont..... Bayard, Morrill County, Nebr..... La Crosse, La Crosse County, Wis..	Mother and son left Minnesota for home in Iowa after having been exposed to smallpox in Minneapolis. Broken out with smallpox in Minneapolis 5 days after leaving Montana for Minnesota. Returned home (Nebraska) after exposure to smallpox while visiting in Minneapolis. (Never vaccinated.) Sent directly to Minneapolis quarantine hospital on arrival from Wisconsin.
Eveleth, St. Louis County. Minneapolis Health Department, Hennepin County.	United States Public Health Service. Jenner, Alberta, Canada.....	Smallpox brought into Minnesota by 3 immigrants from Finland. Case, never vaccinated, left Minneapolis after exposure to smallpox for his homestead near Jenner, Alberta.

TYPHUS FEVER.

Texas.

Senior Surg. Pierce reported that during the week ended March 17, 1917, 5 new cases of typhus fever were reported at El Paso, Tex. During the same week, at points along the Mexican border, 40,362 persons were inspected. Of this number 4,665 were disinfected for destruction of vermin, and 1,806 were vaccinated. Five persons were refused admission for refusing disinfection, and 26 were refused admission because of illness.
